Detergent, based on soap and organic solvents, used for cleaning flat and rotary screens from all residues of printing pastes after printing.

To be used with the following inks series:

- TEXILAC
- MNK
- ECOTEX
- BB 95 R
- TEXIFLOCK
- TEXIPLAST

We suggest to clean the screens, as soon as possible, after printing and not to leave the inks to dry in the screens.

Apply SCREENCLEAN ST (either pure or diluted with water at a rate of 1:1) with a sponge or a spray gun onto the screen and rub thoroughly with a brush. Rinse the screen after a few minutes with plenty of water.

PACKINGS: 1 and 5 lt.
